

As a resident in the Chicago area, we have continually lost Christian radio stations. (Another one goes off of the air tomorrow). K-Love offers all of us a choice. Almost all of the other stations on the air play songs with suggestive or offensive lyrics. While we have the option to turn these stations off, having an alternative to listen to is WONDERFUL!!! There are many students in this area that listen to K-Love, including my own two children. The influence on these kids as well as for some adults has been tremendous. This station offers a POSITIVE influence and encouragement to all who tune in. This station should be allowed to stay on the air. It is not supported by commercials, but entirely by its listeners. This says a lot about the people that choose to listen to this radio station. Like cable TV, it is not entirely free, but it is one of the best bargains and investments that I make every month. I know that there are many people that feel they have no one else to turn to and they call into K-Love for help and support. They have helped many people through many trials through their pastoral staff, like preventing suicides. How more important can a radio station be? What other station can make this claim, that they are actually saving lives! How much more can a station serve the public than this? Please do not even consider taking this station off of the air and replacing it with another one! Thank you for the chance to comment on this station.
